

Bomb Countermeasures for Security Professionals CD-ROM

U.S. Government Pricing and Purchasing Information

The Bomb Countermeasures for Security Professionals CD-ROM provides security, force protection, and EOD instructors with a single tool for training personnel in bomb protection related topics. Using the latest multimedia technology, the BCSP CD-ROM presents the most complete survey of threats and countermeasures ever assembled in a COTS training program—equivalent to over 16 hours of traditional instruction.

Some of the topics addressed in the Bomb Countermeasures program include:

Evolution of the Threat • Bomb Perpetrators • Characteristics of Explosive Devices • Threat Operational Methods • Risk Assessment and Bomb Security Planning • Proactive Defense Against Personally Delivered IEDs, Mail Bombs, Anti-Vehicle Explosive Attacks, and WMD-Scale Vehicle Bombs • Bomb Threat Management • Bomb Detection Technology • Blast Mitigation • Post-Blast Response
